Job Description	

Introduction

A career in IBM means you'll be part of a team that transforms our customer's challenges into solutions.

Seeking new possibilities and always staying curious, we are a team dedicated to creating the world's leading AI-powered, cloud-native solutions for our customers. Our renowned legacy creates endless global opportunities for our IBMers, so the door is always open for those who want to grow their career.

We are seeking a Software Developer intern to join our team. As part of our team, you will be responsible for developing and maintaining high-quality products, working with a variety of technologies and programming languages. IBM's product and technology landscape includes Research, Software, and Infrastructure. Entering this domain positions you at the heart of Software, where growth and innovation thrive.

This position resides in Markham, ON and is a 8, 12 or 16 month work term commencing in May 2025. It is mandatory that all applicants are enrolled in full-time studies at a post-secondary institution and returning to full-time studies upon completion of the work-term.

As a key member of our dynamic team, you will play a vital role in crafting exceptional software experiences. Your responsibilities will encompass the design and implementation of innovative features, fine-tuning and sustaining existing code for optimal performance, and guaranteeing top-notch quality through rigorous testing and debugging. Collaboration is at the heart of what we do, and you'll be working closely with fellow developers, designers, and product managers to ensure our software aligns seamlessly with user expectations.

Job Requirements

Required technical and professional expertise

- Software Development Expertise:

- Background in software development, demonstrating expertise in programming languages such as Java, Python, or C++.
- Cloud Technology Proficiency:
- Experience with cloud-based technologies, showcasing familiarity with modern cloud ecosystems and tools.
- NoSQL Database Knowledge:
- Proficiency in NoSQL databases, particularly experience with technologies like Cloudant, adding value to data management practices.
- Self-Starter Mindset:
- A self-starter with a proactive mindset, able to initiate and drive projects independently.
- Excellent Problem-Solving Skills:
- Demonstrated excellence in problem-solving, with the ability to tackle complex issues and find effective solutions.
- Collaborative Team Player:
- Ability to work seamlessly as part of a team, contributing to collective goals and fostering a collaborative work environment.

Must be eligible to work 8, 12 or 16 months starting in January or May 2025.

- Preferred technical and professional experience
- Previous experience in software development job roles is an asset
- Registered in a formal co-op/internship program

Citizenship Requirement N/A
