Country	Canada
Duration	4 months
Salary Currency	CAD
Salary	25.0 per hour for 0 Major List
Job Description	

Position Summary

16 weeks, paid internship, commencing Summer 2025. Open to BC residents only who currently have the right to work in Canada. The IT Intern will be assisting the IT Department in ensuring that systems and services are ready and operational for production use. The Intern will help with testing new products and technology used by ILM Vancouver's production departments as part of a larger team. The Technology Intern will assist with infrastructure audits including planning for and completion of both back- and front-end technology refresh cycles. The successful candidate will contribute to operational improvements within the team, such as developing scripts to automate and solve task-related problems, reviewing existing services and procedures, and reporting on findings to the team.

What you'll do

The ILM IT team based out of ILM Vancouver's downtown office, works closely with other Lucasfilm and ILM divisions, including production, corporate and Disney business segments. We deliver a broad range of IT services, either directly or in partnership with other teams, in order to help ensure the delivery of client projects. This includes hardware and software for desktop, network, storage, servers and media systems and much more.

- Build and deploy desktop systems at scale, including Linux, Windows and Mac

- Provide assistance to both onsite and remote operations
- Contribute to daily operational tasks, including managing inventory, resolving support tickets and general troubleshooting
- Assist as needed with work on systems and infrastructure such as storage, servers and core services both in the cloud and on-premise

The pay rate for this role in Vancouver is C\$25.00 per hour. Select benefits may be provided as part of the compensation package, such as medical, financial, and/or other benefits, dependent on the level and position offered.

About Industrial Light & Magic:

Founded in 1975 by George Lucas, ILM is the leading effects facility in the world, serving the motion picture, commercial production, and attraction industries. ILM has created visual effects for over 325 feature films and has played a key role in seven of the top 10 worldwide box-office hits of all time and has contributed to 25 of the top 50. ILM has set the standard for visual effects, creating some of the most stunning images in the history of film. At the forefront of the digital revolution, the company continues to break new ground in visual effects, VR, AR, and Immersive Cinema.

About The Walt Disney Company:

The Walt Disney Company, together with its subsidiaries and affiliates, is a leading diversified international family entertainment and media enterprise that includes three core business segments: Disney Entertainment, ESPN, and Disney Experiences. From humble beginnings as a cartoon studio in the 1920s to its preeminent name in the entertainment industry today, Disney proudly continues its legacy of creating world-class stories and experiences for every member of the family. Disney's stories, characters and experiences reach consumers and guests from every corner of the globe. With operations in more than 40 countries, our employees and cast members work together to create entertainment experiences that are both universally and locally cherished.

This position is with ILM (Vancouver) Inc., which is part of a business we call

Industrial Light & Magic.

Job Requirements

What we are looking for

- This position is open to anyone with a deep interest in technology and its application to creative and media production, such as visual effects, games, animation, sound or music and would be particularly suitable for someone pursuing a degree in Media, Computer Science or a similar degree
- Excellent verbal and written communication skills required. Strong interpersonal skills and the ability to effectively interact with diverse personalities is important.
- Good time management skills and the ability to multi-task and prioritize
- Competent at working both autonomously and in team settings

Nice to have:

- Passionate about film and visual effects production and technology
- The ability to think logically and break complex issues into smaller tasks/steps when troubleshooting
- Familiar with desktop and server hardware components including repair and basic troubleshooting
- Experience working with multiple operating systems, including Linux, Windows and Mac
- Exposure to programming concepts and experience with e.g. shell/bash or Python
- Familiarity with databases, network storage and virtualization technology a plus

Citizenship Requirement N/A
