**Job Description**

#### **About the team**

Maestro is a world-class, unique technology providing lightning fast calculations and powerful collaboration capabilities via its 1TB memory-based database, always-on analytics, simulation tools, and rich UI. In this role, you will develop web application features using a variety of technologies (TypeScript, React, C#) that will bring the power of Maestro to an expanding user community.

**This is a full-time, 4, 8, or 12-month position, starting May 2025.**

**To be eligible for a Co-op or Intern position at Kinaxis, you must either be currently enrolled in full-time education or, if you are a recent/upcoming graduate, your graduation date must be within 12 months of the placement end date.**

#### **What you will do**

In this role, you will be part of a team that will transform Maestro into a scalable platform and enable our customers and partners to build custom applications.

- Conduct research, prototype new feature ideas
- Develop high quality code that meets requirements

- Work closely and collaboratively with the development team on a daily basis
- Unit test modules and work with the test team on automation testing
- Apply the Agile/Scrum development methodology to produce high quality software
- May perform additional projects upon request

## **Job Requirements**

### **What we are looking for**

- Currently enrolled in a program where software development is the primary focus.
- Have previous experience in or familiar with C#, ASP.NET, TypeScript
- A passion for developing great software
- Solid knowledge of object oriented programming
- Experience in the development of .NET applications
- Strong problem-solving and analytical skills
- Excellent verbal and communication skills
- Self-starter with strong initiative

### **Things that would definitely help**

- Experience with GIT
- Understanding of design patterns
- Experience in multi-threaded programming

**Citizenship Requirement** N/A
