Job Description	

Job Title: Solution Developer (Student Position)

Job ID: 3028

This a student position that is either 4 or 8 months in duration, with preference for 8 months (May - August 2025, or May - December 2025). You must be a student registered in a Canadian College or University.

This position is for students returning to school after their work term or requiring a placement as requirements for graduation. While not required, preference will be given to students enrolled in a registered Co-op program.

Job Summary:

We are seeking a motivated and enthusiastic Co-op Student to join our dynamic IT team. In this role, you will gain hands-on experience in Java-based application development, support, and configuration, working with technologies such as Tomcat, JBoss, Angular, and databases. This is an excellent opportunity to apply your academic knowledge in a real-world environment, collaborate with experienced professionals, and contribute to the success of our applications and systems.

Key Responsibilities:

1. Application Support:
 - Provide technical support for Java-based applications, including troubleshooting and resolving issues.
 - Monitor application performance and ensure high availability and reliability.
2. Configuration and Deployment:

- Configure and maintain application servers such as Apache Tomcat and JBoss.
 - Assist in deploying applications and updates to production and testing environments.
3. Development and Enhancement:
- Collaborate with the development team to design, develop, and enhance Java-based applications.
 - Work with Angular for front-end development and integration with back-end services.
4. Database Management:
- Write and optimize SQL queries for database interactions.
 - Assist in database maintenance, including backups, updates, and performance tuning.
5. Documentation:
- Create and maintain technical documentation for applications, configurations, and processes.
 - Document troubleshooting steps and resolutions for future reference.
6. Collaboration:
- Work closely with cross-functional teams, including developers, QA engineers, and system administrators.
 - Participate in team meetings and contribute to project planning and discussions.

What We Offer:

- Hands-on experience with cutting-edge technologies.
- Mentorship from experienced IT professionals.
- A collaborative and inclusive work environment.
- Opportunities to contribute to real-world projects and make a meaningful impact.

The base salary for this position is between **\$44,700 - \$67,000** annually. This represents base salary only and does not represent other variable compensation components of our total compensation (i.e. annual bonus, commission etc). If you are selected to move forward in our recruitment process, your recruiter will be able to discuss additional details of our total rewards program with you.

Career opportunities will be open a minimum of 5 business days from the date of posting, closing dates will vary depending on the search activity. All applications received will be reviewed on a rolling basis.

Be your best at Canada Life- Apply today!

Being a part of Canada Life means you have a voice. This is a place where your unique background, perspectives and talents are valued, and shape our future success.

You can be your best here. You're part of a diverse and inclusive workplace where your career and well-being are championed. You'll have the opportunity to excel in your way, finding new and better ways to deliver exceptional customer and advisor experiences.

Together, as part of a great team, you'll deliver on our shared purpose to improve the well-being of Canadians. It's our driving force. Become part of a strong and successful company that's trusted by millions of Canadians to do the right thing.

Canada Life serves the financial security needs of more than 13 million people across Canada, with additional operations in Europe and the United States. As members of the Power Financial Corporation group of companies, we're one of Canada's leading insurers with interests in life insurance, health insurance, investment and retirement savings. We offer a broad portfolio of financial and benefit plan solutions for individuals, families, businesses and organizations.

We are committed to providing an inclusive, accessible environment, where all employees and customers feel valued, respected and supported. We are dedicated to building a workforce that reflects the diversity of the communities in which we live, and to creating an environment where every employee has the opportunity to reach their potential.

It is our priority to remove barriers to provide equal access to employment. A Human Resources representative will work with applicants who request a reasonable accommodation during the application process. All information shared during the accommodation request process will be stored and used in a manner that is consistent with applicable laws and Canada Life policies. To request a reasonable accommodation in the application process, contact talentacquisitioncanada@canadalife.com. Canada Life would like to thank all applicants, however only those who qualify for an interview will be contacted.

Job Requirements

Qualifications:

- Currently enrolled in a Computer Science, Software Engineering, or related program.
- Basic understanding of Java programming and object-oriented design principles.
- Familiarity with application servers such as Apache Tomcat and JBoss.
- Exposure to front-end development using Angular or similar frameworks.
- Knowledge of SQL and experience working with relational databases (e.g., MySQL, PostgreSQL, Oracle).
- Strong problem-solving skills and attention to detail.

- Excellent communication and teamwork skills.
- Ability to learn quickly and adapt to new technologies.

Preferred Skills (Not Mandatory):

- Experience with version control systems (e.g., Git).
- Basic understanding of RESTful APIs and web services.
- Familiarity with Linux/Unix environments.
- Knowledge of DevOps practices and tools (e.g., Jenkins, Docker).

Citizenship Requirement N/A
