Job Description Front-End Developer

Location: Vancouver, British Columbia

Inspire the World, Create the Future

Do you believe in the power of technology to help shape a brighter future and a stronger global community? Are you inspired by the possibilities? Are innovation, camaraderie, and the pursuit of excellence part of your innate drive? Then you've got what it takes to succeed at Samsung.

Samsung R&D Canada is looking for an enthusiastic co-op student who will be responsible for implementing front-end services required for a web application. In this role, you will work with talented software engineers on real world global-scale projects. The primary focus will be to develop frontend logic, make API requests, and handle responses from back-end services. A basic understanding of front-end technologies is necessary.

What You'll Do

- Implement cloud-based products and services
- Integrate with external customer and 3rd party systems
- Write sound code, perform code reviews, write unit and integration tests
- Write documentation
- Participate in team scrum
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency

Additional Details

- Salary is \$18-\$25/hr or \$30 (Co-op pay will be determined based on a number of factors and may vary depending on job-related knowledge, completed study terms, relevant skills, and experience)
- 8 months (May-December)

- Hybrid (3 days in office)
- Office is located in Vancouver
- Interviews will be 30-45 minutes with selected candidates

Samsung is an equal opportunity employer. We thank you for your interest in working for Samsung. Only candidates selected for an interview will be contacted.

Job Requirements

What You'll Bring

- Pursuing a Bachelor's or Master's degree in Computer Science or Engineering
- Some knowledge or experience in one or more of the following areas:
- Modern JavaScript (ES7+)
- React (most preferred)
- React based meta frameworks like Next.js, Remix, Tanstack
- NPM / PNPM
- Webpack (and Module Federation plugin)
- CSS/SCSS
- TypeScript
- Component library tools like ShadCN, RadixUI, MUI, or others.
- Have general understanding of web related protocols (ex. TCP/IP, REST, gRPC, HTTP 1/2/3, TLS, Web Sockets), building micro front-end apps, CI/CD and source versioning (ex. GitHub, GitHub Actions)
- Have basic computer science fundamentals in data structures, design patterns, algorithm design, and complexity analysis
- Team player with great interpersonal and communication skills
- Self-motivated and strive to find answers when faced with roadblocks

Bonus / Nice to have

- E2E willingness to act on problem solving independently of the technology involved
- Backend knowledge on Java, Springboot, Kafka and related technologies
- REST API design and development

Citizenship Requirement N/A
