Fullstack Software Engineer Intern (Spring/Summer 2025)

About Capital One Canada

We've been helping millions of Canadians for over 20 years by providing them with access to credit. We're on a mission to put our customers first, and keep them there, by building digital solutions to simplify and humanize the world of credit cards for millions of Canadians.

What's it like to work in the Capital One Software Studio?

We love open-source and working with the latest technologies. Whether you're an Apple fan or an Android lover, prefer NoSQL databases over relational or just like to hack away using available technologies at your fingertips, you'll be a great fit for one of our amazing teams! We listen - to our people, and to our customers. We change with the times, currently working remotely with plans to move to a flexible hybrid model (remote and/or in-office) in the future.

Think it. Code it.

A day in the life of a Capital One Software Engineering Intern

Team Sprout is a group of devoted & talented engineers who have the passion to make a difference. On Team Sprout, you'll have the opportunity to learn, design and build software products from the ground up. We're on a mission to revamp the hiring process for engineers by creating new tools to automate the hiring process, make it easier for our recruiters to keep track of new applicants

and to create scheduling tools that will make the process of booking an interview seamless.

You will have the opportunity to work on different layers of technology and collaborate with external teams to help achieve our mission. You will be involved in building infrastructure, feature development, testing (unit test, component test and integration test), deployment, monitoring and fixing cyber security and vulnerability fixes.

Technology

- **IDE:** Visual Studio Code
- **Database:** DynamoDB
- **Language:** Javascript, Typescript
- **AWS:** S3, Lambda
- **Monitoring Tool:** Splunk, New Relic
- **Testing Framework:** MockitoJ UnitRunner

What you'll be doing as a Software Engineer

- Work as part of a dynamic team throughout the software development life cycle
- Collaborate with designers and analysts to implement enhancements or new applications
- Develop code to meet story acceptance criteria
- Conduct design and code reviews to ensure high-level quality output
- Ensure adherence to continuous improvement practices as required to meet quality, and time to market imperatives
- Maintain records to document program development, and revisions
- Provide third-level support of software solution as needed

Basic qualifications:

- Will obtain a Bachelor's degree or higher December 2025 or later
- Good communication, presentation, and writing skills
- Good understanding of testing fundamentals
- Experience in unix or linux operating systems
- Able to work within a team setting and actively participate and collaborate in team discussions

Preferred qualifications

(Don't have them all? Don't worry. We'll help you develop the right skills for the job)

- Experience in front end development such as JavaScript, HTML, mobile, frameworks such as React, Vue, Angular
- Experience with backend technologies such as Python, Spring Boot, Node, AWS, Azure, Google Cloud etc.
- Experience with Java programming development / Spring
- Experience with Jenkins CI/CD, microservices, API design / integration
- Experience with version control technology i.e. Git
- Experience in a Linux/Unix environment with strong coding background

What's in it for you?

- Hybrid work environment (3 days in office); flexible work hours
- Invest in Yourself Days (last Friday of each month) dedicated to self-driven learning & development, Civic and statutory holidays
- Equipment allowance

Application Details:

- Please include your **cover letter, resume and unofficial transcripts in one PDF** in the attachment section under Resume/CV when you create your profile to apply
- **Please ensure you complete your assessment no later than January 10, 2025**
