Job Title: Software Engineer Intern/Co-op - CSS (Summer 2025)

Job ID: R_1392920

Application Deadline: January 31, 2025

TD is committed to providing fair and equitable compensation opportunities to all colleagues. Growth opportunities and skill development are defining features of the colleague experience at TD. Our compensation policies and practices have been designed to allow colleagues to progress through the salary range over time as they progress in their role. The base pay actually offered may vary based upon the candidate's skills and experience, job-related knowledge, geographic location, and other specific business and organizational needs.

As a candidate, you are encouraged to ask compensation related questions and have an open dialogue with your recruiter who can provide you more specific details for this role.

Job Description:

DEPARTMENT OVERVIEW

Co-op and Internship opportunities allow you to gain valuable work experience across a number of the businesses at TD. You will work with experienced colleagues, receive world class training, and be part of a community of students across TD, where you will have an impact, grow as individual and experience our culture of care.

Our Co-op/Intern Programming is offered with select Co-op and Internship roles, and is designed to help you better understand the TD business, build on critical career capabilities, and broaden your professional network. This program is designed to complement your on-the job experience and features:

- Leadership talks with key Leaders from across the organization
- Lunch and Learns on topics such as Innovation
- Diversity and Inclusion and Personal Branding and so much more

JOB DESCRIPTION

You will have the opportunity to work with one of our various teams within the Technology group. From Day 1, you will be treated as an equal member of the team and given meaningful assignments to help us deliver improvements to our technology platforms. This could include platforms such as core banking, customer servicing, or customer engagement.

Job responsibilities for a Software Engineer Intern/Co-op may vary by area. This may include, but is not limited to the following:

- Assist in the development/maintenance of comprehensive processes for prevention of issues and participate in problem determination and timely resolution of incidents applying appropriate quality measures
- Work with business partners to define and develop detailed business requirements
- Design, develop and deploy system enhancements
- Perform Unit and System Integration testing
- Document system deployment plans for system implement and code deployment
- Participate in Proof of Concept (POC) on new technologies and document findings
- Provide recommendations with full usability analysis.
- Conduct program/ system research, analysis, detailed design and problem resolution
- Respond to business and users' enquiries on business applications
- Troubleshoot and determine root cause and resolution for application defects
- Ensure defect free programming by testing and debugging using available/appropriate tools and participate in reviewing peer coding
- Apply Software Development Life Cycle (SDLC) and Project Management Methodology (PMLC) to complete specific development tasks for projects.
- Adhere to standard security coding practices to ensure application is free of most common coding vulnerabilities
- Continuously enhance knowledge/expertise and keep current with leading-edge technologies trends/developments and develop expertise in TD services, applications, infrastructure, analytical tools and techniques that can contribute to effective solution development/delivery

ADDITIONAL INFORMATION

Please note that this is a general posting. If you are selected for an interview, more information regarding which business group and the specific job duties will be provided.

Early Talent Requirements

- This position is a 4-month work term and will commence May 5th - August 29th, 2025.
- Applications must include a resume (maximum of 2 pages).
- We welcome all applications; however, we will only contact qualified candidates chosen for an interview. Thank you for your interest.
- TD requires employees to reside in Canada where the role is located. Successful candidates are expected to arrange relocation to one of our Toronto offices in a hybrid model (1-3 days per week in office).

Assigned Line of Business Requirements

Please note that the line of business that you are assigned to may require specific skills not mentioned in this posting
