<b> Job Title <b>	S25 Software Development Engineer (SI Products) 166597
Position Type	Co-op Position
Job Location	Richmond, BC
Country	Canada
Duration	8 months
Work Mode	Hybrid
Salary Currency	CAD
Salary	45000.0 per year for 40 Major List
Job Description	

*You will be part of* a team that implements and delivers one of our **Stratus Imaging Software Solutions** here at **Optum/Change Healthcare Imaging, Workflow & Care Solutions**. Your role will extend from documenting software, implementing bug fixes, and helping conceptualize and design and implementing new solutions. You will work closely with your fellow testers, developers and product owners to implement high quality software products.

**Optum/Change Healthcare** values creativity and innovation. Your skills are matched by your willingness to take on new challenges as we continuously expand the scope of Change Healthcare products and services. You are required to be a self-starter, team player, quick learner, very efficient in your daily activities and not afraid of challenges.

You will be developing SAAS applications consisting of backend services, web services, and web clients. The work will require you to analyze requirements and designs to develop test cases for new features. You will also be troubleshooting customer reported issues and correcting errors in releases of the Change Healthcare Workflow software product suite.

The work will provide direct experience in using enterprise tools for application lifecycle management, e.g., defect management, requirement management and code management. As a medical device manufacturer, the product development work operates under the purview of various quality systems standards and regulations. You will be exposed to and received basic training on quality standards like ISO 13485:2003 and ISO 14791:2007. In addition, the software development will build up your domain knowledge on medical imaging systems - a critical component in delivery of patient care.

## **Job Requirements**

### **Essential Qualifications**

- Experience with Cloud Infrastructure, GCP/AWS
- Knowledge of software engineering concepts, experience developing in Javascript, C# and possibly C++.
- Experience in Web Development, with a focus on the latest web-browser related standards is an optional asset.
- Good verbal and written communication skills.

### **Education:**

- **2nd, 3rd or 4th year of Bachelor degree with courses in C++/C# and software development**
