About Us

Are you ready to embark on a career that truly affects people around the world? Trulioo invites you to be a catalyst for change in the dynamic realm of digital identity verification. As the global front-runner in our industry, we are redefining how businesses grow,

innovate and comply online.

Picture yourself at the forefront of innovation, contributing to our award-winning platform that enables organizations worldwide to quickly onboard customers, optimize costs and combat fraud. Fueled by Silicon Valley support, Trulioo stands as the trusted platform that can verify more than 5 billion people and 700 million business entities spanning 195 countries.

But Trulioo is more than a tech company. We are a united force of dedicated experts committed to establishing trust online.

Headquartered in Vancouver and with strategic hubs in San Diego and Dublin, we foster a culture of collaboration and open communication. Our offices support a hybrid model and staff typically work three days per week at a hub location. Join us where excitement meets innovation and contribute to a world where trust and technology unite.

Position Summary

We are looking to grow our technical team and want to hire a goal oriented, high-energy, Junior Software Engineer co-op.

What you'll be doing

- Work as part of a cross-functional feature team to deliver complete, high-quality, end-to-end solutions.
- Work collaboratively with Engineering and Product to expand stories into tasks and work on removing impediments.
- Collaborate in meetings with Senior Engineers to integrate deliverables, optimize the automation processes, and plan future implementations.
- Based on user story acceptance criteria, work with the team to design a scalable, robust, and reusable solution to that story.
- Document and communicate designs to others on the team.
- Contribute to guidelines and coding standards used for building reusable application components that are easy to maintain, troubleshoot, and test.
- Participate in peer design and code reviews.
- Identify and assist in mitigating technical, schedule, and other project risks.
- Provide technical input into product road maps, negotiating compromises between business and technical constraints.
- Provide input into process improvement initiatives to improve the quality and timeliness of deliverables with high predictability.

Working at Trulioo

You will be challenged to achieve, develop, and grow as part of a hyper-growth company. We offer you the opportunity to make a difference and create a better world by revolutionizing how technology, trust, and identity intersect online. We are on a mission to make sure no one is left behind and everyone has the opportunity to participate fully in the modern digital economy. In order to do this well, diversity and inclusion have always been fundamental to our mission, our culture and our life. Trulioo is proud to be an equal opportunity employer and our commitment to inclusion across race, gender, age, religion, identity and experience connects us with the customers and communities we serve, attracting top talent and passionate changemakers across the globe. Our mission matters for billions of people everywhere.

Trulioo welcomes applications from people with disabilities. Support is available upon request for candidates taking part in all aspects of the selection process. Finally, we know from time-to-time emergencies happen and you may need to reschedule an interview - we understand and encourage you to be in communication without worrying about losing the opportunity or your credibility.
