Job Description	

GAQ226R3

At Databricks, we are passionate about helping data teams solve the world's most challenging problems - from making the next mode of transportation a reality to accelerating the development of medical breakthroughs. We do this by building and running the world's best data and AI infrastructure platform so our customers can use deep data insights to improve their business.

At Databricks Information Technology (IT), we are a product-led organization transforming the way data is sourced, designed and used to help us scale seamlessly in the face of incredible growth.

As a Software Engineering Intern of the Business System Engineering team, you will deliver delightful digital experiences to our business teams and our customers. You will learn basic principles of Software Development to build and enhance the applications, integrations and backend systems for our internal business. As a Software engineer, you will develop custom applications, build backend data structures and apis.

The impact you will have:

- Work with the IT Business Systems Engineering team to roll out new data driven capabilities to help business teams such as HR, Finance, Marketing and Sales
- Participate in full Development Lifecycle: design, development, testing, optimization, documentation and operations in production environment
- Build solutions and products with a high degree of reliability, scalability and security

What we look for:

- You will graduate in Fall 2025 or Spring 2026 with a degree in Computer Science, Engineering or Information Systems.
- You have implementation skills with programming languages such as Python, Java, Javascript, frontend frameworks such as

React or Angular and querying languages such as SQL.

- You have good knowledge of algorithms, data structures and OOP principles; experience with distributed computing and data science is a plus.
- You are excited to solve ambiguous problems with a collaborative team.
- You are excited to solve unique business problems and participate in a collaborative team environment.=

Pay Range Transparency

Databricks is committed to fair and equitable compensation practices. The pay range(s) for this role is listed below and represents base salary range for non-commissionable roles or on-target earnings for commissionable roles. Actual compensation packages are based on several factors that are unique to each candidate, including but not limited to job-related skills, depth of experience, relevant certifications and training, and specific work location. Based on the factors above, Databricks utilizes the full width of the range. The total compensation package for this position may also include eligibility for annual performance bonus, equity, and the benefits listed above. For more information regarding which range your location is in visit our page here.

SF Bay Area Hourly Rate

\$44-\$48 USD

About Databricks

Databricks is the data and AI company. More than 10,000 organizations worldwide - including Comcast, Condé Nast, Grammarly, and over 50% of the Fortune 500 - rely on the Databricks Data Intelligence Platform to unify and democratize data, analytics and AI. Databricks is headquartered in San Francisco, with offices around the globe and was founded by the original creators of Lakehouse, Apache Spark™, Delta Lake and MLflow.
