Job Description

Job Description:

Here at Rakuten Kobo Inc., our mission is to make reading lives better. We stand for readers. We also stand for our employees - from interns and co-ops to permanent staff - and support their growth and development. Whether you are a student at the start of your career or a professional carving a different path, our early careers opportunities are built with you in mind - with experiences tailored to your individual skills and interests.

We offer a start-up environment, interesting and engaging work within the technology and publishing industries, and a group of friendly and talented individuals. Additionally, our employees rank us highly in terms of commitment to work-life balance and a company culture committed to caring for our employees.

If you're looking for a company that inspires passion, personal, and professional growth - join Kobo and come help us on our mission of making *reading lives better*.

The Role:

Rakuten Kobo Inc. is looking for a Software Quality Assurance Engineer Co-op to join our Research and Development International team as a co-op for 12 months starting in Summer 2025! The team is comprised of many highly talented enthusiastic individuals who ensure the services and offerings from Kobo are available to both internal and external customers.

Reporting to the Global Delivery Manager, the Software Quality Assurance Engineer Co-op will work with the Global Delivery Team made up of Developers and Testers and take an active part in delivering high quality software to Rakuten Kobo's users.

The Person:

- A passion for software development and delivery
- Excellent oral and written communication skills

- Have a desire to work in a team but also be self-organising enough to be able to work on a task independently

The Skillset:

Required:

- Some previous experience in and Object-Oriented Software Language such as C# or Java
- An understanding of T-SQL Databases
- Experience with web technologies (HTML, JavaScript, CSS)
- Knowledge of using source control systems such as Git or TFS
- Knowledge of software testing
- Techniques such as Static (Manual or Automatic, using Veracode or SonarQube) and Dynamic (Unit, Integration, etc).
- Tools such as Visual Studio, NUnit, MSTest, Postman etc.

Nice to have:

- An understanding of server-side web technologies such as Web API and MVC
- Experience developing and executing test cases
- Experience with Selenium or Playwright is an asset

The Perks:

- Flexible hours and hybrid remote working environment
- Subsidized in-office lunches
- Talent and development training budget
- Free Kobo device + free weekly e-book or audiobook
- Weekly Kobo Tech University sessions
- Dog friendly office
