Job Description

About the team

Making new supply chain planning solutions possible with Machine Learning is what our fast-growing team of developers is all about. We build creative solutions that solve real business problems for our Maestro users without the need for them to become Machine Learning experts.

We are looking for a talented candidate to join our development team for a placement. It's an opportunity for you to get real hands-on experience with Machine Learning software development and all the components needed to deploy it into a production system.

This is a full-time, 4 or 8-month position, starting May 2025.

To be eligible for a Co-op or Intern position at Kinaxis, you must either be currently enrolled in full-time education or, if you are a recent/upcoming graduate, your graduation date must be within 12 months of the placement end date.

What you will do

- As a Co-op/Intern on the ML team you will be treated like a full-time developer and get to work on everything from tech selection to production code on our latest projects

- You will be working with a mentor from whom you can learn and who will provide support and guidance
- Your projects may include development of new product ideas as well as demos to executives and patent applications
- You will have access to the training that you need and start to make an impact within a few weeks of joining the team
- You will write Python code for microservice architectures
- May perform additional projects upon request

Job Requirements

What we are looking for

- You are curious and passionate about applying Machine Learning to solve real problems
- You're always learning, trying out new ideas and experimenting with technology
- You love to work in a team to learn from and to teach others
- You like to develop new technology, business and people skills and you always welcome a challenge
- You have some hands-on experience with ML through work terms or hackathons, competitions, etc.
- You've completed 1+ year in a Computer Science or Engineering program

Citizenship Requirement N/A

APPLICATION INFORMATION
