Job Location	Vancouver, BC
Country	Canada
Duration	4 or 8 months
Work Mode	Hybrid
Salary Currency	CAD
Salary	21.0 per hour for 40 Major List
Job Description	

Our Ideal QA Analyst:

You're excited about the opportunity to be part of a development team working on greenfield projects, where you can share ideas and make meaningful contributions to build something amazing. Your communication and organizational skills are exceptional, and you enjoy problem-solving. You bring innovative ideas to the table and have the expertise to put them into action. Most importantly, you're passionate about learning new technologies and thrive in a fast-paced environment, where you'll be diving into coding from day one.

The role will likely be hybrid, with one day a week in the office and the other four days remote, though this is subject to change. We're looking to fill the position for 8 months, with the possibility of continued part-time or full-time work after the co-op period.

Responsibilities

- Participate in strategic discussions around the design of new products and services
- Contribute to the design and development of new software systems
- Test new systems and implement necessary fixes
- Collaborate within a cross-functional team environment and engage with other departments and stakeholders to assess business requirements

- Assist the Prevue Support team in responding to technical questions or inquiries as needed

The role will be hybrid, with one day a week in the office and the other four days remote,. We are looking to fill the position for 4 to 8 months, with the possibility of continued part-time or full-time work after the co-op period.

Job Requirements

Required Skills and Experience

- Strong understanding of software development concepts, design patterns, and object-oriented design
- Demonstrated success with HTML, CSS, and JavaScript
- Thorough knowledge of Windows and PCs
- Impeccable written and spoken English skills

Nice-to-haves

- Experience with .NET Core, Entity Framework, C#, MVC, Visual Studio, and other Microsoft-centric development technologies
- Experience with cloud platforms such as Amazon Web Services (AWS), Microsoft Azure, or Google Cloud Platform (GCP)
- Experience in software testing and QA
- Experience with SQL Server, MySQL, or other relational databases
- Experience in architecting and designing software systems
- Exposure to graphics, design, and UI/UX

Citizenship Requirement N/A
