<b>Job Description</b>	

Arlo is looking for a top student with strong interest in product testing a complex product that includes multiple clients, embedded firmware, and cloud storage. The Software Test team is responsible for validation and quality assurance of new products, new technologies, and new features.

This work term with Arlo offers exposure to:

- State-of-the-art IP cameras and home automation products
- Standard test methodology and techniques
- Commercial product development life cycle

#### Responsibilities:

- Execute manual and automated tests based on customer requirements
- Write clear bug reports for any software defects discovered during testing
- Assist development teams with troubleshooting customer or field issues
- Analyze software defects and verify bug fixes
- Develop and maintain automated test tools
- Create test plans and write test reports

#### Job Requirements

### Job Requirements:

- Attention to detail and technical curiosity
- Experience in executing moderate to complex test cases
- Strong written and oral communication skills
- Software test development, programming, or scripting experience
- Knowledge of data communication, networking, and protocols
- Ability to work effectively both independently and within a team environment

**Citizenship Requirement** N/A
