Job Description	

Description Summary

Join us for a unique 3-month software development track that provides personal and professional development in a creative collaborative team setting. As a software engineer summer associate, you will solve complex business problems while utilizing the latest technologies. You will have the opportunity to learn about our different business areas, platforms, and teams.

We are looking for creative and enthusiastic software engineers who thrive in a collaborative team setting. In this role, you will:

Support your team in the development of software based on agreed projects and platforms

Utilize the latest technologies to scale applications

Work closely with different teams across platform, infrastructure, engineering, data, investments, finance, and other teams throughout the firm

Minimum qualifications:

- Currently pursuing a Bachelor of Science?degree in Computer Engineering, Computer Science, or related technical field
- Proven knowledge of at least one high-level programming language and its framework (Python, C#, C++, Java, etc.)
- Energetic, technical, and equipped with the skills and knowledge to drive results

Preferred qualifications:

- Ability to work independently and in a team environment
- Excellent communication, problem solving, and organization skills with a proactive, positive attitude

Passion for new technologies through personal projects and commitment to learning new skill

With respect to NY and CA based applicants, the starting base pay range for this role is between \$8000 and \$9000 monthly. The actual base pay is dependent upon several factors, including, but not limited to, relevant experience, business needs and market demands. This role may also be eligible for bonus compensation and employee benefits.

Citizenship Requirement N/A
