Job Description

Job Title: 2025 Summer Intern, Software Developer

Job ID: 4350

At Zimmer Biomet, we believe in pushing the boundaries of innovation and driving our mission forward. As a global medical technology leader for nearly 100 years, a patient's mobility is enhanced by a Zimmer Biomet product or technology every 8 seconds.

As a Zimmer Biomet team member, you will share in our commitment to providing mobility and renewed life to people around the world. To support our talented team, we focus on development opportunities, robust employee resource groups (ERGs), a flexible working environment, location specific competitive total rewards, wellness incentives and a culture of recognition and performance awards. We are committed to creating an environment where every team member feels inspired, invested, cared for, valued, and have a strong sense of belonging.

What You Can Expect

Position Summary

Under the supervision of the Software Development Manager, you will contribute to the software development of the second generation of the ROSA System, a robotic platform designed to assist surgeons in the placement of instruments and implants in the brain.

How You'll Create Impact

Role and Responsibilities

- Develop and implement user-friendly front-end interfaces using HTML/CSS, Angular, and TypeScript
- Perform required tests and document the results
- Write quality documentation necessary for product commercialization (design requirements, risk analysis, etc.)

- In an Agile environment, be responsible for:
- Tracking time spent on tasks
- Providing time estimates for task planning
- Identifying potential roadblocks

Job Requirements

Your Background

Education/Experience Requirements

- B.S. in engineering being pursued; completed sophomore status or higher

Skills and Abilities

- You are bilingual (French and English, both written and spoken)..
- You have knowledge of Angular/TypeScript, HTML, and CSS.
- You are familiar with version control systems such as Git/GitLab.
- You have a passion for solving complex problems.
- You are a proactive individual capable of efficiently managing multiple tasks in parallel while respecting priorities and deadlines.
- You have strong teamwork skills and can work effectively in a multidisciplinary team.
- You are detail-oriented, have strong analytical skills, and can produce precise, concise, and accurate reports and documentation.
- You are recognized for your excellent communication skills.
- You have a strong interest in the orthopedic field and in improving people's quality of life.

Only candidates selected for an interview will be contacted.

Citizenship Requirement N/A
