Job Description

This is a full-time 8 or 12-month position, starting May 2025.

About Kinaxis

In 1984, we started out as a team of three engineers. Today, we have grown to become a global organization with over 2000 employees around the world, with a brand-new HQ based in Kanata North in Ottawa. As one of Canada's Top Employers for Young People (2024), we want to help you take the first step in crafting your career journey.

At Kinaxis, we power the world's supply chains to help preserve the planet's resources and enrich the human experience. As a global leader in end-to-end supply chain management, we enable supply chain excellence for all industries, with more than 40,000 users in over 100 countries. We are expanding our team as we continue to innovate and revolutionize how we support our customers.

Location

This is a hybrid position. You must be in the Ottawa, Canada office, at least three days a week.

About the team

Our Data Ingestion team is playing a key role in that mission by building the tools necessary to get data in and out of our intelligent platforms as easily as possible for our users. We're continuously improving the speed, flexibility, and scale of data ingestion by adopting new technologies and approaches in an ever-evolving data landscape. We are a small and highly collaborative Agile team looking to add another member.

What You Will Do

- Design and develop new components of our data ingestion, contributing to all phases of development and deployment in private and public clouds.
- Build secure SaaS enterprise software services and applications.
- Collaborate closely with your agile team members and other stakeholders.
- Participate in our agile process to continually improve delivery, quality, and reliability.
- May perform other projects as required.

We're accepting applications now through end of day on Friday, January 24, 2025. All submissions will be reviewed during this time, as well as after the posting closes.

Job Requirements

What We Are Looking For

- Demonstrated proficiency with any common programming language: Java, JavaScript/React, C#, Python
- Knowledge/experience in object-oriented design, data structures, and algorithms.
- Experience in relational databases (Postgres, Oracle, MySQL.)
- Detail-oriented and strong analytical skills.
- Strong communication skills and ability to articulate complex ideas and concepts.
- Demonstrated ability to adapt and learn in a fast-paced environment.

Things that Would Help

- Experience building full-stack applications.
- Some exposure to dev-ops concepts with containerization (e.g.: Docker, Kubernetes, Helm).
- Experience with ETL tools, big data, and data integration.

Citizenship Requirement   N/A
