Job Details
Description
Our Marine organization is a trusted provider of innovative solutions for the worldwide boating and boat building industry, and we recently expanded our scope to lead the boating industry into an electrified future. Dometic has won numerous NMMA Innovation Awards over the years, and we are always striving for new ways to make boating easier, safer, and more enjoyable.
We are on a journey of continuous growth - now looking for our next star - a passionate **Co-op Quality Engineer**. This position reports to Test Engineering Manager and will work in Vancouver, B.C.
**Please note that this position is open to current students enrolled in a Canadian accredited university and co-op program.
Vancouver:
Dometic Marine's headquarters are in Vancouver, British Columbia in Canada. The facility develops and manufactures hydraulic, electronic, and combustion-based products.

As **Co-op Quality Engineer** on the Vancouver team, you will be focused on supporting the development of connected systems within our dynamic manufacturing environment. Previous students have led the design and development of connected dashboards to visualize operational performance and product quality trends - we are one of the first teams in our company to implement these reporting and automation tools, and these students have been integral in shaping these systems. We work to tailor projects and objectives to our students' skillset, experience, and most importantly, interests. We want **you** to have a great experience!

General Responsibilities

• Lead and implement 1-2 Continual Improvement Projects
• Troubleshoot production failures, field failures, and design problems
• Develop quality systems and automated reporting methods

Here is what our previous students have told us as to why they liked their co-op terms:

• Wide variety of tasks - usually 2-3 projects on the go at a time
• Great supervision and mentorship but also get to work independently - guidance-based leadership and self-directed learning
• Supportive engineering and technical staff throughout the facility
• Great comradery among the co-op students, as well as, with the engineers
• Exposure to both worlds of product development and manufacturing processes since we do it all in one facility!

What do we offer?

You are offered an interesting role in a dynamic, fast paced and global environment with great opportunities to grow, evolve with the company and take on new challenges.

• Statutory Holidays
• Free on-site parking
• Company events
• Opportunities to make an impact

Dometic's Core Values

To thrive and succeed in this role, you understand the importance of our core values - Together We build our future, We play to win, We embrace change and We walk the talk; these values reflect the heart and soul of Dometic and they define what it takes to work here and how we do things.

Are you our next star? Then we would love to see your application.

Dometic is passionate about building together an inclusive and equitable working environment, that respects individual strengths, views, and experiences. We believe that diversity enables us to thrive across our differences. Be yourself and join us!

Dometic is proud to be an equal opportunity employer. Dometic evaluates qualified applicants without regard to race, color, religion, age, gender, national origin, disability status, protected veteran status, sexual orientation, gender identity or expression, or any other characteristic protected by federal, state, or local laws.

Job Requirements

Skills & Requirements

• Must be enrolled in an Engineering or Computer Science program at an accredited university
• Strong problem solving and decision-making abilities
• Excellent verbal and written communication skills in English
• Well-developed organizational skills with the ability to manage a variety of tasks
• Strong proficiency with MS Office programs including: Word, Excel, Access, Outlook and PowerPoint; and the ability to learn other applications quickly
• Experience with Automation tools (MS Forms, Power Automate), programming/database development, and Power BI is an asset

Citizenship Requirement   N/A
