Job Description	

Job Title: Software Engineering Intern, Network Management

Job ID: R-10324

This is a full time, remote Summer Internship that can be based anywhere in the United States or Canada.

Calix is looking for a Summer intern to join our Network Management team. In this role, you will be part of a unique and award-winning internship program within the company. The program provides the opportunity to learn new skills through training and on the job learning. The duration of the program is expected to be 90 days.

In this role, you will work in a collaborative team environment to enhance and expand the in-house test automation framework. The results of your work will be used across the Products Cloud organization for improved productivity and test coverage.

Responsibilities and Duties:

• Develop software and tools for Calix networking platforms.

• Document and test networking software applications.

• Work with cross functional development teams across the organization

• Add features to the existing frameworks.

• Participate in technical discussions within engineering group in all phases of the Sofware Development Life Cycle (SDLC): review requirements, produce design documents, participate in peer reviews, produce test plans, and support the QA team.

• Support test strategy and automation in both end-to-end solution and functional testing.

#LI-Remote

Compensation will vary based on geographical location (see below) within the United States. Individual pay is determined by the candidate's location of residence and multiple factors, including job-related skills, experience, and education.

For more information on our benefits click here.

There are different ranges applied to specific locations. The average base pay range (or OTE range for sales) in the U.S. for the position is listed below.

San Francisco Bay Area Only:
27.60 - 34.50 USD Hourly
All Other Locations:
24.00 - 30.00 USD Hourly

Job Requirements

Qualifications:

• Currently enrolled in a college degree program in Computer Science or Computer Engineering. Preference will be given to those
  who have at least completed their Junior year and who have work experience.
• Hands-on programming experience in C/C++, Python, Go.
• Experience in Unix, Linux operating system.
• Working knowledge of Networking protocols.
• Strong verbal and written communication skills.
• Able to work for the complete summer break (May - August or June - September).

Citizenship Requirement   N/A
