Job Title: Software designer - coop
Job ID: 84761
Job Description

Schneider Electric Victoria acknowledges that our people are privileged to live and work in the traditional territories of the Lkwungen, Malahat, Pacheedaht, Scia'new, T'Sou-ke and W?SÁNE? peoples. Schneider Electric endeavors to continue to work with Indigenous First Nations to respectfully acknowledge history and mutual goals for prosperity.

Discover the opportunity to join an international, dynamic, and responsible company that fosters the development of all its people around the world. Every day, we empower employees to achieve more and experience exciting careers. Find out how our values and unique position make Schneider Electric the employer of choice.

What will you do?

You will be part of a team doing development work on one of Schneider's cloud platforms. The teams work on software that helps customers around the world better manage their energy usage and contribute to a greener planet. Your experience as a part of our team will include:

• Working on an agile team with senior software developers, testers, product owners and architects
•Checking in changes to the codebase using Microsoft tools
•Designing, implementing, and executing tests
•Assist in the continuous improvement of product quality and contribute to the product and planning decisions
•Be key part of an agile team from planning to execution to reporting
•Working with a continuous software delivery build pipeline and virtual machine infrastructure

What's in it for me?

The base pay compensation for this full-time position is starting at CAD20.00 per hour for candidates who are B.C. residents. Schneider Electric also offers our employees on fixed-term employment holidays and paid time off.

Care. Connect. Challenge. Commit.

Our values define our company. Who we are, our customer approach, how we do business, what it's like to work here, and the kind

of people we want to attract and retain. We care for our planet, our customers, our company, our team, and ourselves. We connect to customers and colleagues; we are open and respectful. We challenge others and embrace challenges ourselves. We commit to change by leading the change. Join Schneider Electric and together, let's make the most of your energy.

Let us learn about you! Apply today.

You must submit an online application to be considered for any position with us. This position will be posted until filled.

Looking to make an IMPACT with your career?

When you are thinking about joining a new team, culture matters. At Schneider Electric, our values and behaviors are the foundation for creating a great culture to support business success. We believe that our IMPACT values - Inclusion, Mastery, Purpose, Action, Curiosity, Teamwork - starts with us.

IMPACT is also your invitation to join Schneider Electric where you can contribute to turning sustainability ambition into actions, no matter what role you play. It is a call to connect your career with the ambition of achieving a more resilient, efficient, and sustainable world.

We are looking for IMPACT Makers; exceptional people who turn sustainability ambitions into actions at the intersection of automation, electrification, and digitization. We celebrate IMPACT Makers and believe everyone has the potential to be one. Become an IMPACT Maker with Schneider Electric - apply today!

Job Requirements

What qualifications will make you successful?

• Experience in software development in one or more of these technologies: C#.NET, ASP.NET / MVC, HTML/CSS/Javascript, Typescript, Angular, jsp.net, RESTful webservices, WCF, SQL Server

• Excellent written and verbal communication skills

• Ability to self−manage time and tasks effectively

• Self-motivated, with a positive attitude

• Excellent interpersonal skills: team player, able to work well with others locally and remotely.

Desirable:

• Working towards a Bachelor's Degree in Computer Science or Software Engineering

• Experience with Azure

• Experience with Selenium and/or Cypress

• Familiarity with power monitoring / energy management systems

• Experience with multilayered architectures, object oriented design, mobile-first web application development, cloud technologies, real-time communication, cyber security, analytics.

Citizenship Requirement   N/A
